Cell 123 may fulfill the Psychobiology Group requirement provided that at least 27 graded credit hours in psychology comprise the remainder of the major. The CELL123 option therefore precludes the substitution of two upper-level science courses for one psychology elective.

**\*By petition**, the student majoring in psychology may substitute six hours in SSE **beyond the introductory level** for one of the required 300-level non-laboratory psychology electives. Majors who fulfill the psychobiology requirement with CELL123 may not make this substitution. Also note that NSCI600-601 will count toward the 30 cr in PSYC
